BARRETO

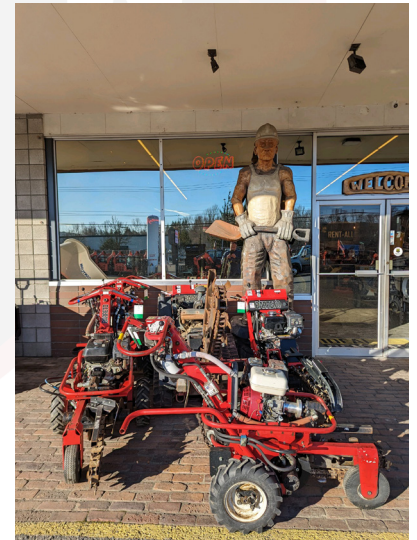

MANUFACTURING, INC.

According to our customers:

“Ideal Rent-All is a successful independent equipment rental provider since 1973. The Barreto track sod cutters have been universally well accepted by customers. From homeowner novices, professional landscapers, to government, the feedback is positive. ROI at 11 months 48%. More important than money, we are solving problems. Helping customers be more productive. Barreto is a fine manufacturing business, so important to the vitality of our industry. They make you feel like you do eating a burger at In-N-Out, speaking for me!”

-Michael McDaniel, Ideal Rent-All

Engineering Innovation:

“When we started developing the new Barreto sod cutter, the goal was simple: fix the problems contractors have dealt with for decades. After testing existing machines, we found common issues with poor traction, complicated controls, and high maintenance components that often failed under demanding conditions. That’s why we decided to utilize tracks to eliminate slipping altogether, improving cutting performance while reducing lawn damage.”

-Stephen Barreto, 7TSC Sod Cutter Engineer
